Experience

BooStudios – Level Design Outsourcing — 09.2026 - ongoing

- Designed, iterated, and implemented level beats for a 3rd person looter adventure game with procedurally generated maps.
- Designed, iterated, and implemented ingredients and interactable objects to contribute to the intended player experience.

Projects

Level Designer, "It's Not You, It's Us" — 02.2026 – 06.2026

- Responsible for 4 out of 5 areas of a 3D isometric point-and-click adventure game featuring 5 characters with unique abilities.
- Designed, iterated, and implemented exploration-centric gameplay beats with a non-linear layout.
- Designed, iterated, and implemented accessible puzzles that onboard the player with new abilities.

Level Designer, "Resonance" — 04.2025 – 06.2025

- Responsible for the entire level design of a top-down twin-stick action game published on Steam.
- Designed, iterated, and implemented combat beats and encounters for fast-paced and push-forwards gameplay centered around telekinesis.
- Designed, iterated, and implemented level ingredients that supported the player experience and guidance.

Technical Designer, "Prohibition Time" — 07.2022 – 03.2023

- Responsible for the entire technical design of a live-multiplayer social deduction browser game inspired by a tabletop card game.
- Designed and implemented a state machine system responsible for handling transitions between stages of the game.
- Designed and implemented game information management system reacting to player actions.

Education

Breda University of Applied Sciences — 09.2024 - ongoing

- Bachelor of Science – Creative Media and Game Technologies

IT technical school SCI — 09.2019 – 06.2024

- VVO – Technician-programmer (bilingual course)

Software
